

# WHERE DOES IT ALL GO?

## THE FATE OF YOUR WASTE

RECYCLING

TRASH

LANDFILL

RECYCLING CENTER

**You** separate recyclables and dispose of your trash in the appropriate containers.

**Housekeeping** collects **blue recycling bags** and **clear trash bags** from inside Penn buildings and offices **together** and transports them to trash and recycling dumpsters at the buildings' designated loading docks. They sort the bags into two streams: recycling and trash.

**Facilities** then picks up trash and recycling separately, and takes them to their appropriate processing site.

From there, **a trash vendor** hauls Penn's trash to dump sites, called **landfills**...OR...

**A recycling vendor** accepts Penn's recycling at their single stream recycling facility, where everything that we recycled on campus is **sorted and remanufactured** so the materials can then be used to create new products!
